

Test funcionales para el 7

Organizado por: Molina Miranda, Jonathan

Para las pruebas a nivel de Back-End se ha utilizado la API de Insomnia que nos permite hacer las peticiones al servidor.

Para cada prueba se adjunta una imagen donde se aprecia la URL de la petición específica, en la izquierda los datos enviados y en la derecha, la respuesta obtenida por el servidor.

Cuenta especial

-SE CAMBIA EL CAMPO **TYPE** QUE IDENTIFICA LA CUENTA VERIFICADA A TRUE (OK)
